

I respectfully request that the Federal Communications Commission not infringe on XM Radio's right to broadcast traffic and weather information. This information proves very useful to me when visiting the Dallas / Fort Worth area. Often when I visit there, I cannot find traffic information on the local AM and FM radio stations. I would be left to guess what the traffic situations are ahead of me if it weren't for XM Radio! XM is filling a niche not covered by the local broadcasters in the Dallas / Fort Worth area. I happily pay for this service every month and it should not be taken away!
